

He knows the nature of "work papers"
more - both specifically &
generally. What did he make &
why, what did he have in his
hands before Commission/ was
it all? & can he account for
any missing - did he in any
way dispose of any other than
by turning over to superiors?
Could - does he think that - the
bruises inside the Pres's
chest were caused by the
surgery? Is it more likely
the surgery or the accident
wound caused the bruises?
